

Extraction footprint on common successes

Pro and Luna · 97 common passing tasks · One point per matched task

Pro > Luna: 85 | Pro < Luna: 10 | Ties: 2

Dashed line: equal values. Above it, Pro has greater size or source overlap, not greater quality.

Pro > Luna: 76 | Pro < Luna: 18 | Ties: 3

RRES = artifact/reference Python LOC. Log axes retain the full RRES range; zero-copy values remain visible.
